

Study of Daily Emotional Experiences

We would like to understand how people experience emotions on a daily basis, and how emotional experiences relate to cardiovascular activity.

Participants will be compensated \$35.00 for their time.

As a participant in this study you will be asked to:

- Respond to a brief questionnaire (approximately 5 min) on a daily basis for 14 days
- Participate in a 30 minute informed consent and fill out initial questionnaires, either at the University of Arizona or at a location of your choosing
- After the daily diary study, come to our lab for an interview and cardiovascular measurement via EKG.

To be eligible for participating in this research, you would need to:

Be over 18 years old

Be able to access to the Internet on a daily basis

Not have a chronic heart condition
